When the rain stops

1. Guess the 2019 harvest

bar chart + slider

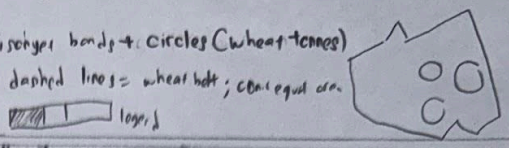

show the real harvest

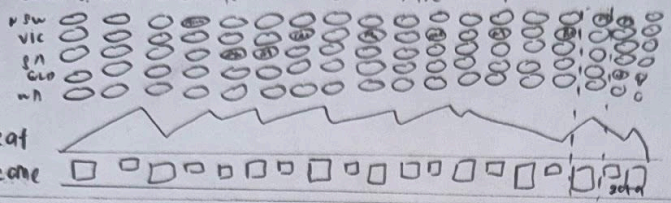

② Only a thin wet crescent can grow grain

isohyet bands + circles (wheat tonnes)

dashed lines = wheat belt; circles equal area

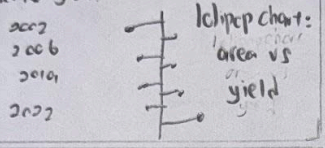

3. 37 seasons one landscape (click any year; the whole page follows it)

heatmap + area + bars + same year axis

4. Farmers still sow. Rain decide yield

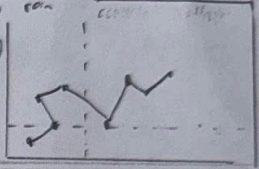

lollipop chart: area vs yield

5. In NSW the harvest follows the rain

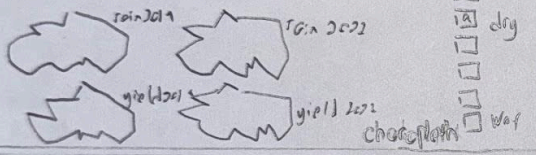

89-99 00-09 10-19 20-25 all

connected scatterplot

rain slider

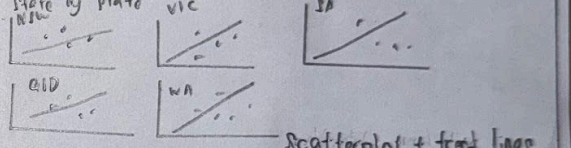

6. four maps: 2019 vs 2022

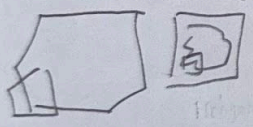

choropleth

7. state by state

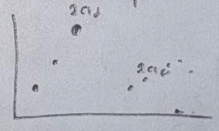

scatterplot + trend lines

8. WA: the average is mostly down

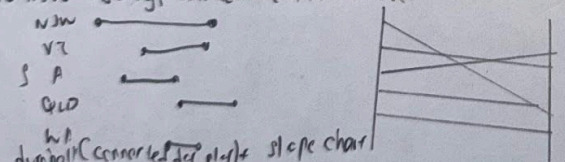

isohyet + inset

9. WA: each dot: the pattern

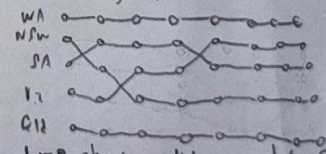

scatterplot: selected years

10. NSW swings hardest: 4th to 2nd

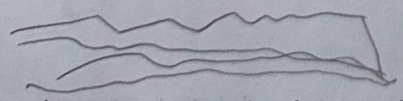

dumbbell (connected dot plot) slope chart

11. rank every season

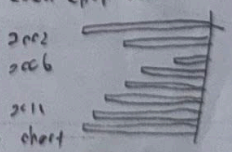

bump chart: click a dot: choose that year

12. the wind, paddock rise and fall,

steamgraph: wheat, barley, canola

13. How far each crop fell

diverging bar chart

when the rain stops, the harvest stops

You guessed __%. Now you know why it was 14.5
